Ensure the Health of your Portfolio with LPS Applied Analytics

Leading servicers are monitoring the heartbeat of their portfolios with LPS Applied Analytics' mortgage performance database. You can, too. As a data contributor, you gain access to loan-level analytics each month to monitor your performance and benchmark your organization against the industry.

Sign up by November 30, and receive a **six-month free trial subscription*** and gain access to:

- Loan-level data on 40 million active first mortgages and five million active second mortgages spanning the spectrum of agency, non-agency and portfolio products
- More than 60 loan-level collateral attributes
- Updated data on the 15th of each month – fastest speed to market in the industry
- “Closeness to the data” – LPS Applied Analytics' analysts collect, compile, process, analyze and interpret the data at a granular level. With this knowledge, these analysts can assist you in developing new strategies and best practices for the data.

Contact your MSP Account Director today to find out more and request your complimentary set of benchmarking reports.

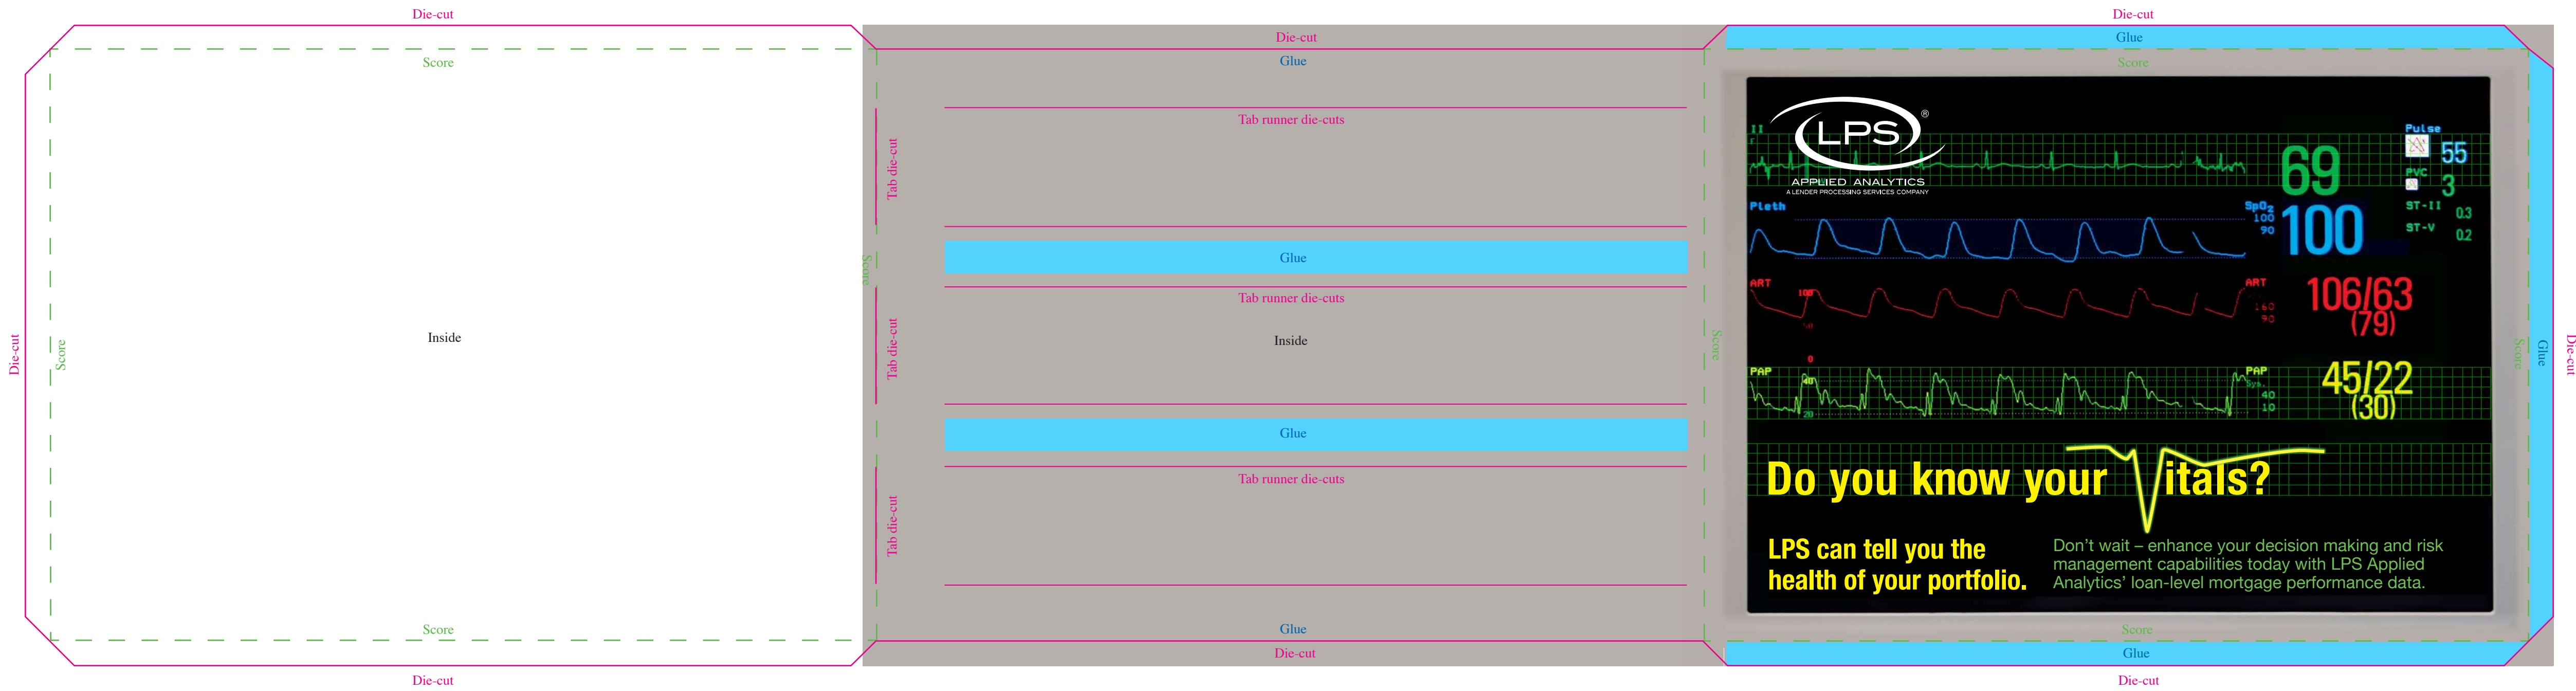

* Free trial requires 12-month data contribution.

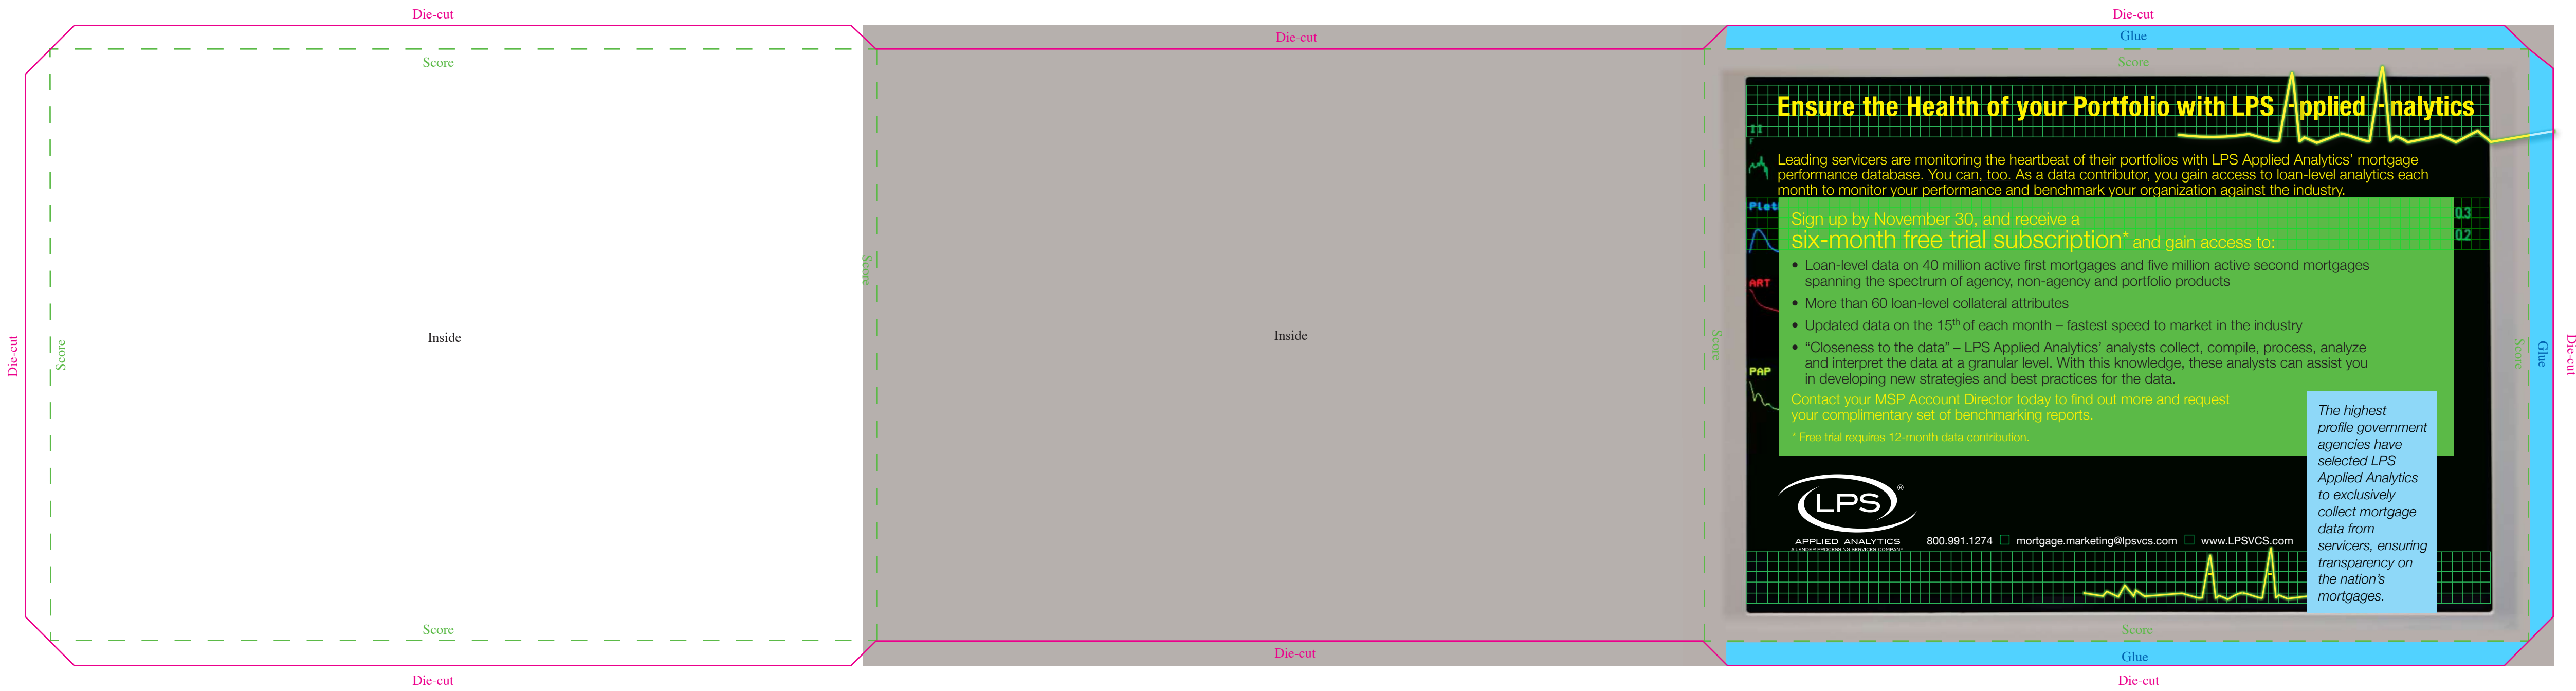

The highest profile government agencies have selected LPS Applied Analytics to exclusively collect mortgage data from servicers, ensuring transparency on the nation's mortgages.
